FACTORIES

SOUTH AUSTRALIA

1964-65

SCOPE This bulletin summarizes information relating to factory operations and shows either in total or by class of factory details of number of factories ; number of persons employed ; salaries and wages paid ; value of land, buildings, plant, and machinery ; value of materials used ; value of power and fuel used ; value of production ; value of output ; and capacity of engines used.

DEFINITIONS For the purpose of the collection from which these statistics are compiled a factory is defined as an establishment in which four or more persons are employed or where power driven machinery is used in any manufacturing, repairing, or assembling process.

The figures relating to employment include proprietors who work in their own businesses but exclude those persons engaged in selling or distribution.

Value of output is the value of the goods manufactured and includes bounty and subsidy payments and amounts received for repair work and work done on commission; it excludes excise duties and all delivery costs and charges.

Value of production is the value added to raw materials by the process of manufacture and is calculated by deducting from the value of output the value of materials used, power and fuel consumed, tools replaced, containers, and repairs to plant and buildings.

Value of land and buildings and value of plant and machinery include estimated amounts for rented premises and plant.

All values in this issue are expressed in decimal currency (\$2 = £1). In tables where figures have been rounded, discrepancies between totals and sums of components are due to rounding.

COMMENT The value of production in South Australian factories has more than doubled during the last ten years from \$242 million in 1955-56 to \$499 million in 1964-65. During this time salaries and wages paid to employees have increased from \$152 million to \$274 million while the value of plant and machinery installed has trebled from \$127 million to \$389 million; the number of persons employed (including working proprietors) has risen from 92,589 persons to 116,183.

The number of factories reporting details of operations in 1964-65 was 5,887, an increase of 1 per cent matching a similar increase in the previous year.

Average employment in factories during 1964-65 increased by 4.8 per cent to 116,183; increases in 1962-63 and 1963-64 were 6.2 and 5.3 per cent respectively. Salaries and wages paid per employee rose by \$233 to \$2,689 for males and by \$60 to \$1,372 for females, being increases of 9.5 per cent for males and 4.6 per cent for females; in 1963-64 there were rises of 3.4 per cent and 5.8 per cent respectively.

The value of production rose from \$427,356,000 in 1963-64 to \$498,588,000 in 1964-65, an increase of 16.7 per cent compared with increases of 2.3, 9.0 and 12.7 per cent in 1961-62, 1962-63 and 1963-64. The largest increases during 1964-65 occurred in factories classified to the motor body, the chemicals and paints, and the plant and machinery industries.
